# PRODUCT DATA SHEET Sika<sup>®</sup> Plastiment<sup>®</sup>-100 Plus

## WATER REDUCING AND RETARDING CONCRETE ADMIXTURE

#### DESCRIPTION

Sika<sup>®</sup> Plastiment<sup>®</sup>-100 Plus is a highly effective water reducing agent with controlled retardation. It has a wide dosage range suitable for many concrete applications.

Suitable for use in tropical and hot climatic conditions.

#### USES

Sika® Plastiment®-100 Plus is used for producing high quality concrete in applications such as:

- Ready mixed concrete
- Fair faced concrete
- High temperature concreting
- Difficult placing conditions
- Long transportation distances

## **CHARACTERISTICS / ADVANTAGES**

Sika<sup>®</sup> Plastiment<sup>®</sup>-100 Plus provides the following properties:

- Long slump retention at high concrete temperature
- Increased setting time in hot weather
- Reduced water without loss of workability
- Increased strength
- Reduced shrinkage and creep
- Better surface finish
- Economic

#### **APPROVALS / CERTIFICATES**

Sika<sup>®</sup> Plastiment<sup>®</sup>-100 Plus follows the requirements of ASTM C494; Types B & D and EN 934 - 2

| Composition                | Modified lignosulphonate  |            |
|----------------------------|---|------------|
| Packaging                  | 200 L drums and 1000 L flow bins<br>Bulk supply in tanker trucks is possible on request   |            |
| Appearance / Colour        | Dark brown liquid   |            |
| Shelf life                 | 12 months from date of production if stored properly  |            |
| Storage conditions         | Store in undamaged, unopened, original sealed packaging in dry conditions at temperatures between +5 °C and +45 °C. Protect from direct sunlight and frost. |            |
| Density                    | ~1.17 kg/l (+25 °C)   |            |
| Total Chloride Ion Content | Nil   | (EN 934-2) |

#### **PRODUCT INFORMATION**

Product Data Sheet Sika® Plastiment®-100 Plus February 2017, Version 01.01 02130301100000468

| TECHNICAL INFORMATION |  |  |
|-----------------------|--|--|
| Concreting Guidance   | The standard rules of good concreting practice for production and placing<br>must be observed when using Sika® Plastiment®-100 Plus in concrete.<br>Refer to relevant standards.<br>Fresh concrete must be cured properly especially at high temperatures in<br>order to prevent plastic and drying shrinkage. Use Sika® Antisol® products<br>as a curing agent or apply wet hessian.  |  |
| APPLICATION INFORM    | IATION   |  |
| Recommended Dosage    | 0.6 - 1.8 % by weight of binder<br>Dosages by weight of binder outside this range can be used depending on<br>the mix design, raw materials, climatic conditions and concrete require-<br>ments.<br>Trial mixes must be performed to establish the exact dosage rate required.   |  |
| Compatibility         | Sika® Plastiment®-100 Plus may be combined with all types of Portland ce-<br>ment and the following Sika products:<br>Sikament® Admixtures to produce longer workability<br>SikaPump®<br>Sika® FerroGard®-901<br>SikaFume®<br>SikaFiber®<br>Sika Aer®<br>Sika Aer®<br>Sika® Stabilizer<br>Sika®-1 WT<br>We recommend to perform trial mixes to establish the required perform-<br>ance when combined with the above products. Please consult our Sika<br>Technical Department.   |  |
| Dispensing            | Sika <sup>®</sup> Plastiment <sup>®</sup> -100 Plus is added to the gauging water or simultan-<br>eously poured with it into the concrete mixer at the batching plant.<br>Do not add Sika <sup>®</sup> Plastiment <sup>®</sup> -100 Plus directly to the dry mix.<br>For optimum utilization of its water reduction / retardation property we re<br>commend thorough mixing at a minimal wet mixing time of 60 seconds.<br>The addition of the remaining gauging water (to fine tune concrete consist-<br>ency) may only be started after two-thirds of the wet mixing time to avoid<br>surplus water in the concrete. |  |

## **IMPORTANT CONSIDERATIONS**

When accidental overdosing occurs the set retarding effect and workability increases, however, no excessive amount of additional air will be entrained. During this period the concrete must be kept moist in order to prevent premature drying out.

## **BASIS OF PRODUCT DATA**

All technical data stated in this Data Sheet are based on laboratory tests. Actual measured data may vary due to circumstances beyond our control.

## LOCAL RESTRICTIONS

Note that as a result of specific local regulations the declared data and recommended uses for this product may vary from country to country. Consult the local Product Data Sheet for the exact product data and uses.

## ECOLOGY, HEALTH AND SAFETY

**BUILDING TRUST** 

For information and advice on the safe handling, storage and disposal of chemical products, users shall refer to the most recent Safety Data Sheet (SDS) containing physical, ecological, toxicological and other safety-related data.
