

## PRODUCT DATA SHEET

# Sika® ViscoCrete® RM 200 CD

### HIGH RANGE WATER-REDUCING AND RETARDING ADMIXTURE WITH ENHANCED WORKABILITY RETENTION

#### DESCRIPTION

Sika® ViscoCrete® RM 200 CD is a polycarboxylate based superplasticizer developed particularly for use in ready mixed concrete to give extended slump retention and high strength development of high specification grade concrete mixes.

Sika® ViscoCrete® RM 200 CD is suitable for use in concrete mixes incorporating pozzolanic materials such as GGBS, PFA and microsilica.

Suitable for use in hot and tropical climatic conditions.

#### USES

Sika® ViscoCrete® RM 200 CD is mainly used for the following applications:

- Production of site mixed and ready-mix concrete
- During hot weather production of concrete with extended transportation or placing times
- Concrete requiring retained workability
- Concrete with low water binder ratio
- Concrete placement in congested steel reinforcement
- Self compacting concrete
- Slim elements requiring a high standard of surface finish
- High performance / high strength concrete

#### FEATURES

Sika® ViscoCrete® RM 200 CD acts by surface adsorption on the cement particles producing steric hindrance as well as electrostatic repulsion between cement particles which results in higher dispersion, flow and retention.

Sika® ViscoCrete® RM 200 CD provides the following beneficial properties:

- Powerful plasticising action
- Production of workable concrete at low water/binder (w/b) ratio
- Improved shrinkage and creep characteristics
- Excellent flowability results in minimal placing and compacting efforts
- Slower rate of carbonation ingress
- Cost effective, structurally economic
- Higher ultimate strengths allows greater flexibility for engineers to design
- Reduces surface defects so improving aesthetic appearance
- Durable concrete
- Does not contain chlorides or other steel corrosion promoting ingredients

#### CERTIFICATES AND TEST REPORTS

Sika® ViscoCrete® RM 200 CD follows the requirements of ASTM C494; Type G and EN 934-2

#### PRODUCT INFORMATION

<b>Composition</b>	Aqueous solution of modified polycarboxylates, co-polymers
<b>Packaging</b>	1000 L flowbin or bulk supply in tanker
<b>Appearance and colour</b>	Brown liquid
<b>Shelf life</b>	12 months from date of production if stored properly
<b>Storage conditions</b>	Store in undamaged, unopened, original sealed packaging in dry conditions at temperatures between +5 °C and +50 °C. Mix well before use.

<b>Density</b>	~1.12 kg/l (+25 °C)
<b>Total chloride ion content</b>	Nil

(EN 934-2)

## TECHNICAL INFORMATION

<b>Concreting guidance</b>	The standard rules of good concreting practice for production and placing must be observed when using Sika® ViscoCrete® RM 200 CD in concrete. Refer to relevant standards. Fresh concrete must be cured properly especially at high temperatures in order to prevent plastic and drying shrinkage. Use Sika® Antisol® products as a curing agent or apply wet hessian.
----------------------------	--

## APPLICATION INFORMATION

<b>Recommended dosage</b>	0.8–2.0 % by weight of binder Higher dosages by weight of binder can be used depending on the mix design, raw materials, climatic conditions and concrete requirements. Trial mixes must be performed to establish the exact dosage rate required.
<b>Compatibility</b>	Sika® ViscoCrete® RM 200 CD is suitable for mixes containing all types of cement and supplementary cementitious materials such as: Microsilica (Silica Fume), Fly Ash (PFA), GGBS (ground granulated blast furnace slag) and the following Sika products: <ul style="list-style-type: none"><li>▪ SikaPump®</li><li>▪ Sika® FerroGard®</li><li>▪ SikaFume®</li><li>▪ SikaFiber®</li><li>▪ Sika® Aer</li><li>▪ Sika® Stabilizer</li><li>▪ SikaControl®</li></ul> We recommend to preform trial mixes to establish the required performance when combining Sika® ViscoCrete® RM 200 CD with the above products or other admixtures. Please consult our Sika Technical Department.
<b>Dispensing</b>	Sika® ViscoCrete® RM 200 CD is a ready-to-use admixture to be added to the concrete as a separate component. Optimal result is obtained if Sika® ViscoCrete® RM 200 CD is poured into the concrete mix right after the addition of the first 80 % of the mixing water, i.e. when all solids are wetted. Avoid adding the admixture to the dry aggregates. Do not add Sika® ViscoCrete® RM 200 CD directly to the dry mix.

## BASIS OF PRODUCT DATA

All technical data stated in this Data Sheet are based on laboratory tests. Actual measured data may vary due to circumstances beyond our control.

## IMPORTANT CONSIDERATIONS

- When using Sika® ViscoCrete® RM 200 CD a mix design must be selected for the local material sources used and trial mixes performed to verify suitability.
- If frozen and/or if precipitation has occurred, it may only be used after thawing slowly at room temperature and intensive mixing.
- Sika® ViscoCrete® RM 200 CD should not be added to dry cement.
- Before pouring, suitability tests on the fresh concrete must be carried out.

- Due to the extended workability take special care that formwork is properly installed and secured. In case the setting time of concrete is extended, if cured properly, other properties may not be affected and higher ultimate strength is visualized.
- Sika ViscoCrete® products are not compatible with admixtures based on sulfonated naphthalene or melamine.

## ECOLOGY, HEALTH AND SAFETY

User must read the most recent corresponding Safety Data Sheets (SDS) before using any products. The SDS provides information and advice on the safe handling, storage and disposal of chemical products and contains physical, ecological, toxicological and other safety-related data.

## LOCAL RESTRICTIONS

Note that as a result of specific local regulations the declared data and recommended uses for this product may vary from country to country. Consult the local Product Data Sheet for exact product data and uses.

## LEGAL NOTES

The information, and, in particular, the recommendations relating to the application and end-use of Sika products, are given in good faith based on Sika's current knowledge and experience of the products when properly stored, handled and applied under normal conditions in accordance with Sika's recommendations. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The user of the product must test the product's suitability for the intended application and purpose. Sika reserves the right to change the properties of its products. The proprietary rights of third parties must be observed. All orders are accepted subject to our current terms of sale and delivery. Users must always refer to the most recent issue of the local Product Data Sheet for the product concerned, copies of which will be supplied on request.
