# SYSTEM DATA SHEET Sikafloor<sup>®</sup> MultiDur ES-24 ECF

## SMOOTH, UNICOLOUR CONDUCTIVE EPOXY FLOOR COVERING

## DESCRIPTION

Sikafloor<sup>®</sup> ES24 ECF is a, decorative and protective dissipative self-smoothing flooring system for concrete or cement screeds with normal up to medium heavy wear.

Suitable for use in hot and tropical climatic conditions.

## USES

Sikafloor<sup>®</sup> MultiDur ES-24 ECF may only be used by experienced professionals.

It is used as:

- Decorative and protective electrostatic conductive self-smoothing system for concrete or cement screeds with normal up to medium heavy wear.
- Suitable as a wearing course in industries, such as automotive, electronics and pharmaceutical manufacturing, storage facilities and warehouses.
- Particularly suitable for areas with sensitive electronic equipment e.g. CNC machinery, computer rooms, aircraft maintenance sheds, battery-charging rooms and areas subjected to high explosion risks etc.

## **CHARACTERISTICS / ADVANTAGES**

- Electrostatic conductive
- Good chemical and mechanical resistance
- Easy to clean
- Economical
- Liquid proof
- Semi-gloss finish
- Slip resistant surface possible

## **APPROVALS / CERTIFICATES**

- Self-smoothing, coloured epoxy resin coating according to EN 1504-2: 2004 and EN 13813, DoP 02 08 01 02 014 0 000007 2017, certified by Factory Production Control Body No. 0921, certificate 2017, and provided with the CE-mark
- Fire classification in accordance with EN 13501-1, Report-No. 2007-B-0181/17, MPA Dresden, Germany, May 2007
- Testing of Paint Compatibility in acc. to BMW- Standard 09-09-132-5, Polymer Institute, Test Report P 5541, August 2008
- Varnishability test according to VW-standard PV 3.10.7 (paint wetting impairment substances (PWIS)) like silicones, HQM GmbH, Test Report 09-09-132-4, 09.2009
- Particle emission certificate Sikafloor®-262 AS N CSM Statement of Qualification - ISO 14644-1, class 4 - Report No. SI 1412-740, March 2015
- Outgassing emission certificate Sikafloor®-262 AS N F CR: CSM Statement of Qualification - ISO 14644-8, class -8.0 - Report No. SI 1412-740. March 2015
- Spark resistance in accordance with UFGS-09 97 23 of coating systems, Test report P 8625-E, Kiwa Polymer Institut, March 2014

System Data Sheet Sikafloor® MultiDur ES-24 ECF June 2020, Version 03.01 02081190000000010 System structure

Sikafloor<sup>®</sup> MultiDur ES-24 ECF:

•		
	1. Primer + Earthing connection	Sikafloor®-151/-161+ Sikafloor® Con- ductive Set (Earthing Kit)
	<ol> <li>2. Conductive primer</li> <li>3. Conductive final coating</li> </ol>	Sikafloor <sup>®</sup> - 220 W Conductive Sikafloor <sup>®</sup> - 262 AS N filled with quartz sand
	Note: Quartz sand is a natural mate in a gloss finish with a different aest The system configuration as describ may not be changed.	
Composition	Ероху	
Appearance	Self-smoothing system – gloss finish	1
Colour	Almost unlimited choice of colour shades. Due to the nature of carbon fibres providing the conductivity, it is not pos- sible to achieve exact colour matching. With very bright colours (such as yellow and orange), this effect is increased. Under direct sunlight there may be some variations and colour variation, this has no influence on the function and performance of the coating.	
Nominal thickness	~ 1.0 - 1.5 mm	
Volatile organic compound (VOC) con- tent	Very low content of volatile organic compounds. Sikafloor <sup>®</sup> -262 AS N, the finishing layer of the Sikafloor <sup>®</sup> MultiDur ES-24 ECF System, has been awarded the Frauenhofer IPA CSM Certicate of Qualification with the report number SI 1412-740. The Outgassin test was performed in accordance with CSM procedures. TVOC: ISO-AMC Class -8.0 (see ISO 14644-8). It fulfils the stringent demands for indoor air quality and low VOC emitting products AgBB see the test report no. 392-2014-00286901A.	

## **TECHNICAL INFORMATION**

Shore D Hardness	~ 80 (resin filled)	(28 days / +23 °C)	(ASTM D2240-15)
Abrasion resistance	~ 50 mg (resin filled)	(CS 10/1000/1000) (28 days / +23 °C)	(ASTM D4060-14) (Taber Abraser Test)
Compressive strength	≥ 70 N/mm <sup>2</sup> (resin filled)	(28 days / +23 °C)	(ASTM C579-18)
Tensile strength in flexure	~ 40 N/mm² (resin filled)	(28 days / +23 °C)	(ASTM C580-18)
Reaction to fire	Bfl s1		(EN 13501-1)

System Data Sheet Sikafloor® MultiDur ES-24 ECF June 2020, Version 03.01 02081190000000010

Chemical resistance	Resistant to many chemicals. Contact Sika technical service for specific in- formation.			
Temperature resistance	Exposure*		Dry heat	
	Permanent		+50 °C	
	Short-term max. 7 d		+80 °C	
	etc.)	Short-term moist/wet heat* up to +80 °C where exposure is only occasional (i.e. during steam cleaning etc.) etc.) *No simultaneous chemical and mechanical exposure.		
USGBC LEED Rating	Conforms to the requirements of LEED EQ Credit 4.2: Low-Emitting Mate als: Paints & Coatings SCAQMD Method 304-91 VOC Content < 100 g/l			
Electrostatic behaviour	Resistance to ground <sup>1</sup>	R <sub>g</sub> < 10 <sup>9</sup> Ω	(IEC 61340-4-1)	
	Typical average resist- ance to ground <sup>2</sup>	R <sub>g</sub> < 10 <sup>6</sup> Ω	(DIN EN 1081)	
	<ol> <li>In accordance with IEC 61340-5</li> <li>Readings may vary, depending equipment.</li> </ol>		0.20. ons (i.e. temperature, humidity) and measurement

**BUILDING TRUST** 

Before applying Sikafloor<sup>®</sup>-262 AS N on Sikafloor<sup>®</sup>-220 W Conductive allow:

Substrate temperature	Minimum	Maximum
+10°C	26 hours	7 days
+20°C	17 hours	5 days
+30°C	12 hours	4 days

Times are approximate and will be affected by changing ambient conditions particularly temperature and relative humidity.

Applied product ready for use	Temperature	Foot traffic	Light traffic	Full cure
	+10°C	~30 hours	~5 days	~10 days
	+20°C	~24 hours	~3 days	~7 days
	+30°C	~16 hours	~2 days	~5 days

Note: Times are approximate and will be affected by changing ambient conditions

## **PRODUCT INFORMATION**

Packaging	Please refer to individual Product Data Sheet.
Shelf life	Please refer to individual Product Data Sheet.
Storage conditions	Please refer to individual Product Data Sheet.

## MAINTENANCE

To maintain the appearance of the floor after application, Sikafloor®-262 AS N must have all spillages removed immediately and must be regularly cleaned using rotary brush, mechanical scrubbers, scrubber dryer, high pressure washer, wash and vacuum techniques etc. using suitable detergents.

### CLEANING

Please refer to the Sikafloor<sup>®</sup> Cleaning Regime.

## FURTHER INFORMATION

Please refer to:

- Sika<sup>®</sup> Method Statement Mixing and Application of Flooring Systems
- Sika<sup>®</sup> Method Statement Surface Evaluation & Preparation

## IMPORTANT CONSIDERATIONS

- This system may only be used by experienced professionals.
- Due to the nature of carbon fibres providing the conductivity, surface irregularities might be possible.
   This has no influence on the function and performance of the coating.
- Do not apply the Sikafloor<sup>®</sup> MultiDur ES-24 ECF sys-

tem on substrates in which significant vapour pressure may occur.

- Do not blind the primer.
- The freshly applied final conductive coating of the Sikafloor<sup>®</sup> MultiDur ES-24 ECF system must be protected from damp, condensation and water for at least 24 hours.
- Only start application of Sikafloor<sup>®</sup> conductive primer after the priming coat has dried tack-free all over. Otherwise there is a risk of wrinkling or impairing of the conductive properties.
- Maximum layer thickness of the final conductive coating of the Sikafloor<sup>®</sup> MultiDur ES-24 ECF system:
   ~ 1.5 mm. Excessive thickness (more than 2.5 kg/m<sup>2</sup>) causes reduced conductivity.
- Under certain conditions, underfloor heating combined with high point loading, may lead to imprints in the resin.
- If heating is required do not use gas, oil, paraffin or other fossil fuel heaters, these produce large quantities of both CO<sub>2</sub> and H<sub>2</sub>O water vapour, which may adversely affect the finish. For heating use only electric powered warm air blower systems.
- The incorrect assessment and treatment of cracks may lead to a reduced service life and reflective cracking - reducing or breaking conductivity.
- For exact colour matching, ensure the final conductive coating of the Sikafloor® MultiDur ES-24 ECF system in each area is applied from the same control batch numbers.

System Data Sheet Sikafloor® MultiDur ES-24 ECF June 2020, Version 03.01 02081190000000010

4/5

**BUILDING TRUST** 

 ESD clothing, ambient conditions, measurement equipment, cleanliness of the floor and the test person have a substantial influence on the measurement results.

All measurement values for the Sikafloor<sup>®</sup> MultiDur ES-24 ECF system stated in the system data sheet (apart from the ones referring to proof statements) were measured under the following conditions:

	0
Ambient conditions:	+23 °C/50%
Measurement device for	Metriso 2000 (Warmbier)
the Resistance to Ground:	or comparable
Surface resistance probe:	Carbon Rubber electrode.
	Weight: 2.50 kg / Tripod
	electrode acc.
	DIN EN 1081
Rubber pad hardness:	Shore A 60 (± 10)

The number of conductivity measurements is strongly recommended to be as shown in the table below:

Ready applied area	Number of measurements
< 10 m <sup>2</sup>	6 measurements
< 100 m <sup>2</sup>	10-20 measurements
< 1000 m <sup>2</sup>	50 measurements
< 5000 m <sup>2</sup>	100 measurements

In case of values lower/higher as required, additional measurements has to be carried out, approx. 30 cm around the point with insufficient readings. If the newly measured values are in accordance with the requirements, the total area is acceptable.

Installation of earthing points: Please refer to the Method Statement: "MIXING & APPLICATION OF FLOORING SYSTEMS".

Numbers of earth connections: Per room at least 2 earthing points. The optimum number of earth connections depends on the local conditions and should be specified using available drawings.

## **BASIS OF PRODUCT DATA**

All technical data stated in this Data Sheet are based on laboratory tests. Actual measured data may vary due to circumstances beyond our control.

## LOCAL RESTRICTIONS

Note that as a result of specific local regulations the declared data and recommended uses for this product may vary from country to country. Consult the local Product Data Sheet for the exact product data and uses.
